Trinseo S.A.	TSE	\$1.74b
Kraton Corp.	KRA	\$680m
Advansix Inc.	ASIX	\$551m

Peer Flag Comparison

The return to a company's stock is not the only measure of executive performance. Ethics matter, and growth can quickly reverse and gains evaporate if a company's accounting and financial reporting processes are not fundamentally sound and trustworthy. How does Ingevity's accounting quality compare to its peer group?

How to analyze a company's Watchdog Report

If you walk into a doctor's office complaining about a pain in your left shoulder, your doctor's training kicks-in and he will immediately begin assessing your age and physical appearance, checking your vital signs and asking you a very specific series of questions about your symptoms. After just a few brief moments of assessing you, the doctor will either begin life-saving intervention or simply hand you an ice pack for your sore arm after a workout.

Like that doctor, we assume you are reading our Watchdog Report because you want to quickly assess the health of the company you are analyzing. You want to know if the company is undergoing any major problems or is simply displaying minor issues. Here is how to get your answer:

BEFORE YOU START

Make sure you have a basic understanding of the company. Know its market cap, the size of its revenues, profits and assets and liabilities. Review any major news related to the financials of the company and its management team.

■ STEP 1 🕒 10 SEC

Scan down the right side of the first page of the company's report, paying attention to the 'RECENT' column to find the latest yellow and red flags.

■ STEP 2 🕒 2 SEC

When you see a red or yellow flag, click the title next to the flag and you will instantly jump to that section of the company's report.

■ STEP 3 🕒 60 SEC

Read that section's headline, the timeline and review the specific issue highlighted for the company's red or yellow flag.

■ STEP 4 🕒 3 MIN

Each section will usually have a link to the original filing or legal summary for the issue. Click that link. If it takes you to a SEC Edgar page, review the original filing. **HINT:** Use your browser's "find" button to search for a key word or number related to the issue as shown on the Watchdog Report.

■ STEP 5 🕒 15 SEC

Review the stock price movement chart on page two of the report. If you check the report online, you can adjust the timeline to a narrow time. The stock movement chart will overlay each of the red and yellow flags to stock price changes. Make note of those red and yellow flags around major stock price declines. These issues are worth reviewing in detail.

■ STEP 6 🕒 1 MIN

Before continuing, it is worth comparing the company to its peers. Go to the third page of the report and compare the red and yellow flags for the company (first column) to the number of companies with red and yellow flags from your company's peer group. Is the company an outlier with a red or yellow flag in an area that other peers have only green? If so, the outlying issues are also worth reviewing in detail.

■ STEP 7 🕒 5 MIN

Repeat steps 2-4 for each red or yellow flag. At the end of this process, you'll have a good idea of the core issues the company has reported.

■ STEP 8 🕒 5 MIN

Now comes the creative, but hard part. Like a doctor trying to understand what might be wrong with a patient, you must now use your judgment, past knowledge and the insights you gathered in the prior steps to develop your own view of how serious the issues are facing the company.

If you see a consistent pattern of delays, accounting irregularities, management turnover, legal troubles, the company is clearly in trouble. Use the peer group analysis step above to see why your company may be different than its peers. Think of the various issues as connected. It seems passé but a bad management team is going to be bad in multiple ways. The challenge is to find the thread that runs through all the issues to understand any management failures.

When you find a pattern of unusual accounting moves, it is almost always tied to management protecting their own interests over investors. You should also consider what particular forces in the industry are affecting the company more than its peers. If you can assess that, try to think about how a company's management might "adjust" the financial disclosures to mask the weakness. It helps to think like a detective here. Everyone is entitled to a presumption of innocence, but if management was trying to hide something, how might they go about doing so?

This step is where we leave you with our 6,000+ Watchdog Reports. Good luck with your analysis!
